## Description of Career Opportunity

At STANCE, a division of Alliant Insurance Services, our team of industry veterans is changing the way traditional insurance due diligence and consulting is done. We work with the rapidly accelerating number of renewable energy lenders, investors, and developers to enable the advancement of green energy by providing insurance and risk management consulting services.

### The role:

We're growing quickly with the continued advance of clean energy in the U.S. and abroad, and looking to add a team member. In this role, you would provide analytical support to the consultant team and stakeholders in the renewable energy and infrastructure space. You would also be responsible for reviewing and summarizing insurance requirements within contracts as well as reviewing and preparing detailed summaries of insurance.

### In this role you will:

- Download, review, and summarize contractual requirements, and identify potential problem areas for consultants;
- Compare contractual insurance requirements to the insurance requirements of financing agreements (debt and/or equity) for compliance;
- Prepare detailed tables in Word summarizing key coverages, terms, conditions and exclusions of insurance policies, including various forms of property insurance, liability insurance and other deal related insurance coverages;
- Update insurance reports with contractual insurance requirements and insurance policy information;
- Follow company protocols to protect confidential information and comply with client non-disclosure and confidentiality requirements;
- Pull FEMA flood maps and SwissRe CatNet® reports for distribution to consultants; and
- Perform other duties as assigned.

---

## Preferred Skills

While not all required, some important qualifications for this role:

### EXPERIENCE

Bachelor's degree or equivalent combination of education and experience

Two (2) to four (4) years related work experience

Insurance experience, including, but not limited to: Commercial Property (Builder's and Operational All-Risk programs), Commercial Liability, and Certificates of Insurance

Large quota share insurance programs or global placements

Renewable energy industry experience (insurance, finance, project management, operations)

### SKILLS

Proficient in Microsoft Office products (e.g. Word (including tables), Excel and Outlook)

Familiarity with Nitro and/or Adobe

Attention to detail

Excellent verbal and written communication skills

Well-developed time management, planning, organizational and prioritization skills

Ability to work within a team and take direction from senior members

Ability to work independently on a deadline basis with little oversight
